Message from the Chairman

2020 Can Be Regarded as the Year of Great Change of FMT

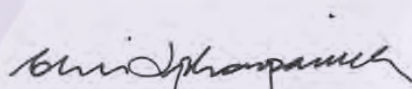

On 1st June 2020, Furukawa Electric Co., Ltd., which was the major shareholder of the Company in Japan, sold its shares of the Company to CTJ Holdings2, Ltd., and on 18th November 2020, the Company has registered the change of the Company name, from Furukawa Metal (Thailand) Public Company Limited to Fine Metal Technologies Public Company Limited.

The global economic crisis caused by the COVID-19 pandemic and the measures to control the spread of COVID-19 by the government of Thailand have caused economic activities in the country to shrink tremendously. Investments in many projects, especially in the industrial sector, were severely limited due to strict lockdown measures. In addition, export volume also shrank, causing air-conditioner manufacturers in Thailand, who are main customers of the Company, to reduce production volume. For instance, the production volume for May 2020 was just half the volume of the same month in 2019. Over all, the production volume for 2020 decreased by 10 percent from 2019.

At the same time, the Company implemented measures to prevent the spread of COVID-19, as well as production and distribution plans in response to rapid fluctuations in the orders. Furthermore, the Company has amended the strategic marketing plan by increasing the production volume of highly valuable copper tube for air-conditioner and refrigerator products. The Company has also been promoting the sale of copper tube products that are used in products other than air-conditioners and refrigerators. For instance, in 2020, the Company sold heat pipe product for use with coolant in 5G communication centers, which are widespread around the world.

Even though the performance in 2020 shows declining sales volume due to the global economic contraction and in countries that are business partners in particular, coupled with hedging loss of the financial instruments with off-setting risk positions in accordance TFRS9 which were effective in 2020. The Company's net profit was 47 million baht or 0.98 baht per share. The Company's Board of Directors proposed to pay a dividend of 1.625 baht per share, same as for 2019.

On behalf of the Board of Directors and executives, we would like to express our sincere gratitude and appreciation towards our loyal customers, business partners and shareholders for their continued trust, support, and confidence in our operations and our dedicated and capable colleagues who are the key driving force and behind our Company's success and competitiveness. While we will continue striving to operational excellence, we are also firmly committed to conducting our businesses with good corporate governance, allowing the Company to flourish even more progressively and responsibly.

Organization Chart

General Informations & Others

Fine Metal Technologies Public Company Limited has changed the Company name from Furukawa Metal (Thailand) Public Company Limited since 18 November 2020, a listed Company in the Stock Exchange of Thailand with securities symbol is "FMT". The Company was established on June 15, 1988 under the name of Furukawa Metal (Thailand) Company Limited and under a joint venture between a Thai holding Company called Tampa Co., Ltd., and 2 Japanese companies, Furukawa Electric Co., Ltd. and Shoko Trading Co., Ltd. to manufacture and distribute various types of copper tube to the manufacturers of air-conditioners, refrigerators and others cooling system.

- Bangkok Office located at 183 Regent House Building 14th Floor, Rajadamri Road, Lumpini, Pathumwan, Bangkok 10330.
- Factory was build on 82 Rai of land located at 213 Moo 4, Mitraparb Road, Tambol Tub-Kwang, Amphur Kaengkhoi, Saraburi Province 18260.

Major Changes Since its Establishment :

Jun 1988

- ▶ Established the Company with registered capital of Baht 140 million. BOI privilege for the seamless copper tube production of 3,000 tons p.a. since October 1987.

Jan 1989

- ▶ Started the construction of seamless copper tube plant on the area of 56 Rai at 213 Moo 4 Friendship Highway km.125th , Tab-kwang, Kaeng Khoi, Saraburi.

Jun 1989

- ▶ Received BOI's approval to expand the promoted production capacity from 3,000 tons p.a. to 4,200 tons p.a.

May 1990

- ▶ Received BOI's approval to increase the production process thread on the wall surface inside the copper pipe.

Jul 1990

- ▶ Started production of seamless copper tubes (Smooth Tube).

Jun 1991

- ▶ Started new product Multi Grooved Tube

Mar 1992

- ▶ Started new product Large Diameter Tube.

Mar 1993

- ▶ Started construction and purchased machinery in order to increase its capacity from 4,200 tons p.a. to 8,400 tonsp.a. This increased the capacity of Smooth Tube, Multi Grooved Tube and Large Diameter Tube also allowed the company to prepare capacity for the production of Capillary Tube, a new product, in 1994.

Jan 1994

- ▶ Increased registered capital from Baht 195 million to Baht 335 million from the three existing shareholders are Tampa Co., Ltd. and Shoko Trading Co., Ltd. and Furukawa Electric Co., Ltd.

Feb 1994

- ▶ Started new product Capillary Tube.

Nov 1995

- ▶ Split Company's par value from 100 baht/share to 10 baht/share.

Feb 1996

- ▶ Transformed the Company status to Public Company Limited and changed the Company's name from Furukawa Metal (Thailand) Company Limited to Furukawa Metal (Thailand) Public Company Limited.

Jun 1996

- ▶ Received BOI privileges of the capacity expansion of 10,600 tons p.a.

Nov 1996

- ▶ Increased registered capital from Baht 335 million to Baht 480 million from general investors purchased of new machine and building by offering 14.5 million shares to the public.

Dec 1996

- ▶ Purchased of new land (26 rais) for future expansion project. (Total 82 Rais)

Feb 1997

- ▶ Approved to be a Listed Company in the Stock Exchange of Thailand.

Oct 1998

- ▶ Developed two additional product designs: taper pipe and half hard.

Jan 1999

- ▶ Received the ISO 9001: 2000 Certification from RWTUV Anlagentechnik GmbH.

Apr 1999

- ▶ Developed another type of Treatment for Capillary Tube Ends (Welding). In addition to the existing Stopper, Flaring, Pinch Seal and Deburing.

Dec 2001

- ▶ Started construction and purchased machinery to increase its production capacity of additional 6,000 p.a. from 16,000 tons p.a. to 22,000 tons p.a.

Jul 2003

- ▶ Began operations in the extension that has been promoted.

Nov 2003

- ▶ The Company increased production capacity 3,000 tins p.a. to 25,000 tons p.a.

Apr 2004

- ▶ The Company received certificate from Center of Administration of Against Narcotics, Amphur Khang Koi, Saraburi Province, to be Excellent Factory Without Narcotics on 2 April 2004.

Aug 2004

- ▶ The Company participated in the Green Factory Project for Her Majesty Queen Sirikit Celebration celebration of the 72 years Queen's Birthday on 12 August 2004 from Director General Labour Protection and Welfare.

Oct 2004

- ▶ The Company increased production capacity from 25,000 tons p.a. to 28,000 tons p.a.

Sep 2005

- ▶ The Company was presented for 2005 Outstanding Workplace of Labor Relationships and Labor Welfare from Department of Labor Protection and Welfare, Ministry of Labor since 29 September 2005.

Oct 2005

- ▶ The Company increased production capacity from 28,000 tons p.a. to 31,000 tons p.a.

Mar 2006

- ▶ The Company received the ISO 14001:2004 Certification from TUV NORD (Thailand) Ltd.

Sep 2006

- ▶ The Company was presented for 2006 Outstanding Workplace of Labor Welfare from Department of Labor Protection and Welfare, Ministry of Labor 18 September 2006.

Mar 2008

- ▶ The Company was presented from the Club TO BE NUMBER ONE Outstanding ; Central / Eastern, establishment of large size category.

Investors can study additional information of the issuing
Company Form 56-1 as shown in the Stock Exchange of
Thailand in www.set.or.th or the Company's website.

Fine Metal Technologies Public Company Limited is a producer and distributor of copper tube which is a vital part in the manufacturer of air-conditioners and refrigerator. As copper tube can give maximum heat transfer and high resistance of chemical corrosion, it serves as a passage for the chemical substance in the cooling equipment and any other piping application which requires a superior heat transfer quality and endurance

The main products are Smooth Tube, Multi Grooved Tube, Large Diameter Tube and Capillary Tube.

The Company has 4 product lines. Each line has specific characteristics as follows

- (1) **Smooth Tube** is a seamless copper tube that has smooth inner tube. There are two types
 - 1.1 **Smooth Tube for heat exchanger** which is used for carrying refrigerant within refrigeration equipment.
 - 1.2 **Smooth Tube for piping** which is used for carrying refrigerant outside refrigeration equipment.
- (2) **Multi Grooved Tube** is seamless tube that the inner wall is threaded to act as the first type of copper tube, but the efficiency on better heating is up to twice, which is popular in the production of the air conditioner of the small type with highly efficient and expensive due to increase inner surface area it's made the amount of copper tube used in production process of cooling coil decreased when compared to the performance with smooth tube. It is also the main export product to Japan and others.
- (3) **Large Diameter Tube** is the straight and large seamless copper tube popular to use as the pressure reservoir tank for refrigerant.
- (4) **Capillary Tube** is the small seamless copper tube to act as the flow of the refrigerant after adjusting the temperature to lower from the compressor to go through the refrigerant inside the room and help to adjust and reduce the pressure of the refrigerant at the suitable level before going to the refrigeration machine

In conclusion, the only product of the Company is seamless copper tube that will be manufactured and sold to clients in the size that each client desires. The sale price is set in accordance with the copper price in world copper market price as at the time when each sale-purchase agreement is made with each particular customer. The manufactured seamless copper tubes are categorized with forms in order to concur with the needs for uses and properties of product in each category as follows :

1. **Level Wound Coil** : a copper tube coiled around a circle core for any customer who want to buy the product in great quantity, such as manufacturers of air-conditioners and refrigerators,
2. **Pancake Coil** : a copper tube with around 50 feet length, loosely coiled for the convenience for use, for retailer customers or cooler installation technicians,
3. **Straight Tube** : a straight copper tube with around 5 meters length, always ordered by retail customers and customers that assemble collars, and
4. **Bunch Coil** : the organized Capillary Tube coiled in groups for customers of all types, from manufacturers to installers.

The Company has a factory of seamless copper tubes, which is located at 213 Moo 4, Mitraphap Road, Tub Kwang Sub-district, Kaeng Khoi District, Saraburi Province, which is a modern factory for the complete circle production, with robust quality control system and production control system in all steps.

Overall Policy

Fine Metal Technologies Public Company Limited. is a manufacturer and distributor of copper tube products, which is a key component in manufacturing refrigeration equipment, such as refrigerators and air conditioners. Because of the copper tube have a good heat conductor and resists corrosion, suitability for use as a chemical pipeline in the refrigeration and is used in piping work required height quality of heat conductor, and long shelf life. The Company has given the great importance to creating the good corporate governance system with transparent and fair to all stakeholders. There is the good corporate governance required by law and ethical duty. The Board of Directors has delegated duties and an important responsibility to the Chairman, the Board of Executive Committee, including the Audit Committee. The Company has set the basic management standard for executives and employees who work with environmental protection and will strive to create social value through technological innovation, respect for the law Comply with social norms and morals, ethics, including maintain and enhance good relationships with all stakeholders and responsible for the sustainable development of society.

Visions

- 1) To become a leader of copper tube markets in Thailand and ASEAN region, as a Company that works safely and peacefully and is trusted by customers, with global acceptance for quality, services, price and punctual delivery for customers' happiness and satisfaction,
- 2) To go forward with the management system that retains profitability from business operations,
- 3) To retain as most market shares in the country as possible and to expand export to more foreign markets,
- 4) To have executives and all personnel of the Company comply with business Code of Conducts on social responsibilities.

Policies and Goals of the Company

The Company has been making Annual Plan for each year. The executives and management of each department have to make the action plan that concurs with the policies and goals of the Company. At the same time, the Company will monitor and evaluate the operations with KPIs that can be applied to the actual assessment, compared with the predetermined action plan, with review and report of the outcomes carried out on the monthly basis.

In 2020, the executives have set the annual budget and made the action plan that has been approved by the Board of a Directors of the Company, with the emphasis on the

sustainable business achievement in a long run and the responsiveness to the needs of all stakeholders. As for 2020, the Company has set the policies and business goals as follows:

- 1) To do research and development for, and to produce new products that support diverse needs of domestic customers inside and export customers ;
- 2) To reduce production cost in order to enhance competitive capacities by enhancing the efficacy of production process;
- 3) To consistently enhance personnel's capabilities and to encourage personnel of new generations who have proper knowledge and capabilities to catch up with the changes in production technologies;
- 4) To enhance the growth of the revenue of the Company every year by expanding customer bases inside and outside the country and looking for new business opportunities that will enable the revenue of the Company to grow in the future;
- 5) To expand the sale of new products that are different from those of other manufacturers to be greater.

The aforementioned principles of business administration must be recognized and strictly complied with by all the executives, heads and personnel of the Company.

Running the business for more than 31 years, Fine Metal Technologies Public Company Limited is aware of the needs of customers that customers of the Company not only emphasize on product price but also have expectations in terms of product quality, service provision capabilities and reliability of the products of the Company. Therefore, the Company has been making marketing plans that suit the structures of business operations and capability of competition, with the aim of enabling the business to grow in the sustainable manner in the future. Therefore, the Board of Directors and the executives of the Company have set the strategies for business administration that respond to customers' needs as follows :

- 1) Concerning product quality, the Company has to manufacture copper tubes that meet standards and have quality, acceptable for customers and competitive with rivals' products in domestic and export,
- 2) Concerning production cost, the Company must control production costs, as well as other expenses, by enhancing productivity and mitigating waste from production process,
- 3) Concerning sale and profit making, the Company has to expand the sale and launch new products that are different from those of other companies, such as straight tube and capillary tube, while

retaining market shares by having products in inventory for short-term delivery during the period of high demand, conducting marketing research works, and expanding the sale for new customers of air-conditioner market and non air-conditioner market in the region of Asia;

- 4) The Company must have logistic systems that enable punctual product delivery and hasty product delivery (in short time), together with quick after-sale services, in order to make satisfy customers;
- 5) The Company must have internal and external communication systems that are efficient, accurate, precise and quick for building common understanding and preventing error from happening or repeating itself again.

The aforementioned principles of business administration must be recognized and strictly complied with by all the management, section head and all employees of the Company.

Goals and Strategies for Sustainable Growth

In order to accomplish the predetermined goals and visions, the Company has the direction for running the business by implementing strategies to enhance competitiveness in term of pricing so that the Company can compete with rivals in global markets and sustain sale volume (profitability), with the efforts of all the executives and personnel who have been working together to eliminate waste and to mitigate production cost. At the same time, concerning quality, the Company has to prevent waste and enhance productivity (Yield) in order to get better products. The strategies for the improvement of operations that the Company has implemented are as follows :

- 1) To establish a development and improvement unit, to appoint consultants to enhance knowledge and expertise of personnel while working together to develop and invent new methods to improve operations and mitigate waste, and to improve actions in order to cut unnecessary costs,
- 2) To have each department make its own personnel enhancement plan that is continuous and systematic, in order to reflect capabilities of working (Multi-Skill) of personnel,
- 3) To adjust marketing scheme by looking for business allies to expand markets inside and outside the country, which will enhance the competitiveness and enable the Company to generate revenue and profit that meet the predetermined target,
- 4) To enhance knowledge and capabilities of personnel; for instance, to have section heads of all section attend a workshop to find solutions to a problem to meet the predetermined goals,
- 5) To determine the thresholds by using KPI (Key Performance Indicators) to reflect the effectiveness of operations of all units by comparing with the goals of the Company, using figures, statistic and outputs from assessments on the monthly basis, throughout the year,
- 6) The executives have planned for and managed to ensure the making of reports of budget for operations and assessments on the monthly basis in order to determined whether operations have been carried out as planned or not and how effective operations are, with the clear determination of improvement.

Business Operations

In 2020, risk factors that may affect the business operations of the Company in analyzing the issue of risk, The Company has reviewed and determined measures to reduce the risk of not affecting the business operations of the Company. Which the risks of the Company are as follows

1. Risk from fluctuation of raw material price of cathode copper sheet

The Company realizes the procurement of raw materials by giving importance to price, quality and time of delivery of raw materials. The Company has regular and effective communication with the seller in order to receive accurate information about the procurement and delivery of raw materials to make the Company receive the raw materials delivery on time

As price of main raw material, including copper sheet having fluctuation of price in world market is very high, the Company has policy not to stock raw materials of copper sheet. The Company will produce raw materials according to the purchase order of customers; the plan for marketing more than three months in advance, joining with Raw Materials Purchase Section and Marketing Section, by Purchasing raw materials suitably for match order. For the price of copper can't answer that tended to decrease or increase. However, in Y.2020 the price of copper was change severely in Y.2019.

This trended that can't hold permanent because the price of copper also depend on factors of price of oil, gold, war and spinning price in the world market, to prevent risk from fluctuation of raw material price, the Company entered into hedge agreements.

Measures supporting risk from depending of raw material purchase ordering

The Company determines policy of raw material purchase ordering. The Company plans in advance for about three months, coordinating with Sales Section, Manufacturing Section and Import Section to provide raw materials. The Company buys raw materials as follows:

1. **Copper Sheet** : as presently there is no copper sheet manufacturer in Thailand, the Company has to import copper sheet from foreign countries. The price of raw materials, or copper sheet, is determined from the price of copper in London Metals Exchange (LME) plus other expense. Due to the fact that copper is commodity, price of copper has dynamics all the time. Therefore, in order to prevent risk which occurs from fluctuation of copper price, the company has measures to support risk from depending of raw material purchase ordering from abroad, by ordering raw material of copper residue in the country as well,

in the ratio of 50:50. In order to prevent problems to be occurred from risk factors which cannot be controlled, resulting in delay because of transport of raw materials, for example, monsoon happening, or disaster events, etc. and in order to prevent such problems, presently, the Company buys copper residue inside the country to melt again, in order to be another type of raw material of the Company, making the Company to be able to determine the amount, quantity and time of delivery independently and more certainly.

Customers of the company can select conditions of determining of ordering of raw materials suitably for purchase order of customers, as follows:

- 1.1 Buying/selling in type of determining copper price in advance in the acceptable level (Hedging) is the method of purchase order that customers want to reduce risk of price fluctuation of world market copper price, by booking for buying/selling in advance.
- 1.2 Buying/selling with average price, rather popular for customers, as the price is that which customer can determine the cost, for example, customer determines to use price of raw material of copper sheet in arrears for one month, or in arrears for two months in the condition of ordering of raw materials in Clause 1.1 and 1.2, the Company will summarize the buying amount and the sales amount at every end day of each month, to make paper trade to reduce stock of raw materials or buying/selling parts to prevent risk for another time. In determining orders of raw materials by customer, the Company will divide price of raw materials according to London Metals Exchange (LME) and fee, customer pays expense.
- 1.3 The Company purchased and procured raw materials, calling the price of raw material, by customer determines the basic conditions and joint production capacity between the Sales Department, Production Department and production Planning Department to control the production of products
- 1.4 The Company have monthly plan to control and manage inventory in suitable situation. The Company set a target and has production planning every month to comply with customers' orders.

2. Risk in Marketing

Risk from importing of copper tube from abroad and price competition of goods is the risk from import competition of copper tube from China, Malaysia and Korea. Competitors from those countries propose sales price of copper tube having cheap price. However, customers have problems on quality of products and service, when products of the company are compared, the problems of quality and service of import of copper tube cannot compete with the quality of the company. In the year 2020, there is import of copper tube from China about 83%; from Malaysia 7 % from Korea about 5% and other country 5%, however the risk of price competition that increases violence. The company has set guidelines for the operation, by focusing on producing good quality products for customers In accordance with the company policy In order to be a leader in the production of copper pipes in Southeast Asia, the company has developed and improved various operating systems and technologies.

3. Competition risk

Copper pipe manufacturing industry in Thailand is an industry that focuses on both domestic sales and export markets, which apart from competing from local manufacturers also have to compete with foreign country manufacturers especially products imported from China that have a large amount and products imported from Korea. Causing increased price competition and the economic conditions had changed the concept of consumers who want quality products and reasonable prices, the company has focused on increasing productivity, providing services and delivering products that can respond to customers for able to compete with other suppliers as well. The company still developed products to support new technology requirement from customer.

4. Labor Risk

At present, Thailand is experiencing more labor shortage problems at the operational level. Especially in the private sector's business due to the higher popularity of higher education to have personnel Not much operating level, The company has implemented measures to reduce labor risks such as offering compensation, welfare and improving workplace safety and environment by aiming that will be a company that can work safely and comfortably and accidents must be zero to motivate employees to come and work with the company.

5. Risk to the Investment of Security Holders

On 1 June 2020, the principal shareholder of the Company, or Daishin P & T Company Limited (the former name of which is Furukawa Electric Company Limited), which is the parent company in Japan, has sold all the shares of the Company to CTJ Holdings 2, Ltd. Therefore, in 2020, CTJ Holdings 2, Ltd. holds 20,280,280 shares of the Company, or 42.25 percent of all the paid-up shares of the Company. The Company still does the copper tube business with stability and growth, and is still a listed company of SET. In addition, concerning the administration, the Company is still run by executives from Daishin P & T Company Limited, who still hold the same positions as before, providing technical supports to the Company in order to make the business of the Company be the first leader in the industry of copper tube industry. There is not any plan to change business or executives of the Company. As a result, CTJ Holdings 2, Ltd. is the principal shareholder with administrative power to control almost all the resolutions of shareholder meetings, including the appointment of directors of the Board or the request for resolutions concerning any other matter that need the majority votes from the meeting, except matters concerning law or regulations of the Company, which must be supported with three-fourths of all the votes in a shareholder meeting. Thus, other shareholder's cannot gather votes to check or balance the issues proposed by the principal shareholder. Nevertheless, the structure of the administration of the Company consists of the following elements:

- 1) The Board of Directors,
- 2) The Audit Committee, and
- 3) The Executive Committee and the Management Team.

Concerning the details of the administration structure, there is the definition of the clear scope of power and responsibilities of each committee (Board). Also, all the 3 members of the Audit Committee are independent directors, from all the 5 independent directors, all of which have knowledge and capability of business management, and understanding of financial statements and reports. Hence, they can make the operations of the Company transparent and accountable. Furthermore, the Company also has the policy on transactions with related people such as directors, executives, big shareholders and other people that may have conflicts of interest, to compare the conditions with those posed by any outsider first before presenting that transaction to the Audit Committee for consideration before presenting it in a board meeting for approval.

6. Industrial Risk

Seamless copper tube that customers use as main material in making air-conditioners, presently there are new raw materials for testing in use instead of copper tube, in making of air-conditioner, that is aluminum. Even though cost of raw materials for production, aluminum is cheaper than copper, and air-conditioner makers still use copper tube products. For effect to be occurred in the future, if manufacturers of aluminum pipe develop quality of production to be used will and there is no problem in welding, when customers use the aluminum pipe, it will affect customers as more customers will use aluminum pipe, but the quality of aluminum pipe dose not tolerate like copper tube. In addition, customers demand smaller copper pipes and higher efficiency to support the new inverter air conditioner. In this part, the company has developed and innovates to produce smaller copper pipes and higher efficiency for support this demand.

7. The Risk from Customer Relocating their Production Base to Other Countries

The major customer of the Company is a manufacturer and a distributor of an air conditioning and a refrigeration, the majority of production base located in Thailand. If the customer moved production base to other country, which production costs is cheaper Thailand in the future, such as Vietnam. It might affect the operating result of the Company but it is not much. However, the Company agrees that Thailand still has the main factor basis decent to continue the production, and be also a potential country on the production with modern technologies, develops production continuously. Moreover, those customers are partners who deal business with the Company for a long time; customers have confidence in the Company's products till today. However, the Company continues to seek new markets and customers both domestic and abroad additionally

8. The Risk of Relying on Personnel

The Company's business requires the knowledgeable, skilled and experienced personnel in order to obtain products with standard and high accuracy to meet the various customers' requirement, the Company has a policy to promote human resource development by providing a training employee course. And gain experience in transferring technology from skilled employees and foreign production expertise which is the manufacturer of that machine

directly. In addition, the Company arranges for job rotation of staff for employees to learn to work and able to work with other machine for reduce the Company's risk of relying on any one person and the Company provides opportunities for talented personnel and is important for the Company's operations participate in the management of the Company in order to build morale as well as to maintain the employees to stay with the organization included to employment retired person to be advisor to advised and development working.

9. Financial Risk Management

Financial risk management policies.

Risk management framework.

The Company's Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The board of directors has established the risk management committee, which is responsible for developing and monitoring the Company's risk management policies. The committee reports regularly to the board of directors on its activities.

The Company's risk management policies are established to identify and analyse the risk faced by the Company, to set appropriate risk limits and control and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company, through its training and management standards and procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Company audit committee oversees how management monitors compliance with the Company's risk management policies and procedure, and review the adequacy of the risk management framework in relation to the risk faced by the Company. The Company audit committee is assisted in its oversight role by internal audit. Internal audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the result of which are reported to the audit committee.

Therefore Credit Risk, Liquidity Risk, Market Risk, Foreign Currency Risk, Interest Risk and Commodity Price Risk all mentioned risks details shown on Company's Notes to the financial statement for the year ended 31 December 2020 .

10. Risk from the Spread of COVID-19 Virus

In 2020, all the countries around the world have faced with the COVID-19 pandemic event. As for Fine Metal Technologies Public Company Limited, the Company has implemented measures to prevent the spread of COVID-19 virus, for saving employees and their families, as well as business partners of the Company. Such measures include, to order all personnel to work from home, to strictly screen everyone entering-exiting the factory and the headquarters by measuring temperature and checking travel records for the past 14 days, to practice social distancing, to prepare hand washing soap and water or hand cleaning alcohol gel at all spots of the Company, to increase the frequency of common space cleaning, to provide to all personnel face masks and PPE, and to launch announcements concerning the prevention against the spread of COVID-19 virus as clear guidelines for all personnel, contractors and visitors to strictly adhere to in order to prevent the infection of COVID-19 virus.

The Company has anticipated the situations in the world and in Thailand that in 2020 and 2021, the world will not be free from COVID-19 virus. Thus, the Company has launched the policy on work from home (WFH) in order to be confident that all personnel and their families and business partners of the Company can continuously deliver products and services to customers. In addition, the Company has been encouraging everyone to follow the directions given by the Centre for COVID-19 Situation Administration (CCSA) and warnings from Ministry of Public Health in the strict manner, and to work from home by using digital technologies such as teleconference. The Company has also implemented the strict measure to carry out the screening process to all personnel and visitors who are entering any of all buildings, including the office and the factory, by measuring temperature, checking their timelines and forcing them to wear face masks, and has also been disseminating information of the spread of COVID-19 virus frequently, through the daily radio broadcast system of the Company in order that all the personnel and contractors working inside the Company areas will be aware of information and updated situation relating to the spread of COVID-19-29 virus and measures to prevent the spread of COVID-19 virus in Thailand. As a result, in 2020, there is no event of COVID-19 virus infection in the Company.

Management Discussion And Analysis

Overview of Operation Results in 2020

The operational performance in 2020 showed the total revenue from net sales of 4,802 million baht, decrease of 1,265 million baht from the previous year, the earning from local sales was 3,062 million baht and earning from export was 1,740 million baht or equivalent to 64% and 36% respectively.

The Company has a net comprehensive income of 47 million baht, decrease by 77 million baht was due to 62% decrease due to the situation of coronavirus pandemic (COVID-19) and hedging gain/loss for hedge of group of items with off-setting risk positions. Since January 01, 2020 the Company had initially applied Thai Financial Reporting Standards ("TFRS") 2 items which comprise :

1. Financial Reporting Standards No. 9
Subject : Financial Instruments (TFRS-9)
2. Financial Reporting Standards No. 16
Subject : Lease Agreement (TFRS-16)

Economic and Industrial Situations

Impacts from the COVID-19 pandemic event have led to the economic slowdown. Thus, partner countries have delayed the orders as well. Consequently, the production of electric appliances in 2020 has shrieked for 3.3 percent because the sales volumes of compressors, electric fans, washing machines and microwave ovens have decreased. Meanwhile, the orders of air-conditioners have tremendously dropped, especially in the markets of China, Japan, ASEAN countries and European countries.

However, the sales volume of air-conditioners in Thailand have lessen 9 percent. In 2020, the sales volume of the Company has decreased due to the impacts from COVID-19 pandemic event. The Company has adjusted itself to be more active. The executives and all staff members work together to manufacture products with the best possible quality with the fullest manufacture capacity, and to seriously and consistently reduce costs. As a result, the Company has still retained sales volumes and enjoyed 47 million baht profit.

Nevertheless, as for 2021, it is anticipated that electric appliance and air-conditioner industry will have increased production and export volumes, compared with those

in 2020, by dint of positive factors inside and outside the country, such as COVID-19 vaccine, government's measures to encourage people to spend money, which have been implemented since the end of 2020 to beginning of 2021. In addition, the demand for inverter air-conditioners tends to rise consistently year by year because this product uses technology that makes the product generate cool air quicker, save money and have higher capacity than conventional air-conditioners. The Company has always been persevere with the development of products that meet customers need and the timely delivery of products to customers, with the emphases on before and after sale services and the sustainment of positive relationships with customers, in order to increase sales volumes of products of the Company and to attained the targeted profitability level.

Net Sales

In 2020, the net sales were 4,802 million baht, decrease of 1,265 million baht, from the previous year. The local sales were 3,062 million baht, or 64% and the export sales were 1,740 million baht or 36% due to impact from the situation of coronavirus pandemic (COVID-19).

Independent Auditor's Report

To the Shareholders of Fine Metal Technologies Public Company Limited (Formerly Furukawa Metal (Thailand) Public Company Limited)

Opinion

I have audited the financial statements of Fine Metal Technologies Public Company Limited (the "Company"), which comprise the statement of financial position as at 31 December 2020, the statements of comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising a summary of significant accounting policies and other explanatory information.

In my opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at 31 December 2020, and its financial performance and cash flows for the year then ended in accordance with Thai Financial Reporting Standards ("TFRSs").

Basis for Opinion

I conducted my audit in accordance with Thai Standards on Auditing ("TSAs"). My responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of my report. I am independent of the Company in accordance with the Code of Ethics for Professional Accountants issued by the Federation of Accounting Professions that is relevant to my audit of the financial statements, and I have fulfilled my other ethical responsibilities in accordance with these requirements. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Key Audit Matters

Key audit matters are those matters that, in my professional judgment, were of most significance in my audit of the financial statements of the current period. These matters were addressed in the context of my audit of the financial statements as a whole, and in forming my opinion thereon, and I do not provide a separate opinion on these matters.

Valuation of inventories	
Refer to Notes 4(e) and 9 to the financial statements.	
The key audit matter	How the matter was addressed in the audit
The main raw material of the Company's products is copper cathode. Copper cathode price was then a significant factor of the cost of inventories. As copper cathode is commodities which can be subjected to market price volatility, in the case of the fluctuation according to the market condition, this may result that the net realisable value of inventories is lower than their cost. This matter involves management's judgment and the Company had a significant inventory balance, thus, this is focus area in my audit.	My procedures included an understanding the Company's policy to estimate the net realisable value of inventories. I performed testing the calculation of the measurement of net realisable value by comparing, on a sampled basis, the cost of inventories against expected net realisable value (i.e. selling price in the latest invoice or price list less estimated cost to complete and to make the sale), and also sampling checked with relevant documents. I also considered the adequacy of disclosures in relation to inventory in accordance with TFRSs.

Other Information

Management is responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements and my auditor's report thereon. The annual report is expected to be made available to me after the date of this auditor's report.

My opinion on the financial statements does not cover the other information and I will not express any form of assurance conclusion thereon.

In connection with my audit of the financial statements, my responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or my knowledge obtained in the audit, or otherwise appears to be materially misstated.

When I read the annual report, if I conclude that there is a material misstatement therein, I am required to communicate the matter to those charged with governance and request that the correction be made.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with TFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

My objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with TSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with TSAs, I exercise professional judgment and maintain professional skepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

I communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I also provide those charged with governance with a statement that I have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on my independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, I determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. I describe these matters in my auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, I determine that a matter should not be communicated in my report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements
For the year ended 31 December 2020

These notes form an integral part of the financial statements.

The financial statements issued for Thai statutory and regulatory reporting purposes are prepared in the Thai language. These English language financial statements have been prepared from the Thai language statutory financial statements, and were approved and authorized for issue by the Board of Directors on 19 February 2021.

1 General information

Fine Metal Technologies Public Company Limited (Formerly Furukawa Metal (Thailand) Public Company Limited), the “Company”, is incorporated in Thailand and was listed on the Stock Exchange of Thailand in 1996. The Company’s registered offices as follows:

- (a) Head Office : 183 Regent House Building, 14th Floor, Rajdamri Road, Lumpini, Pathumwan, Bangkok 10330
- (b) Factory : 213 Moo 4 Friendship Highway Km. 125th, Tab Kwang, Kaeng Khoi, Saraburi 18260

On 1 June 2020, the Company’s shares of 20,280,280 (42.25% of all paid-up ordinary and issue shares) were acquired by CTJ Holdings2, Ltd., a Japanese Company, from Furukawa Electric Co., Ltd. who was formerly the major shareholder. As a result, the new immediate and ultimate controlling party of the Company has changed to CTJ Holdings2, Ltd.

At the extraordinary shareholders meeting of the Company held on 9 November 2020, the shareholders approved the name change to “Fine Metal Technologies Public Company Limited”. The Company was registered with the Department of Business Development, Ministry of Commerce on 18 November 2020.

The principal activity of the Company is the manufacturing and distributing of seamless copper tube, which is an important component for air-conditioner and refrigerator equipment.

2 Basis of preparation of the financial statements

(a) Statement of compliance

The financial statements are prepared in accordance with Thai Financial Reporting Standards (“TFRS”); guidelines promulgated by the Federation of Accounting Professions and applicable rules and regulations of the Thai Securities and Exchange Commission.

New and revised TFRS are effective for annual accounting periods beginning on or after 1 January 2020. The initial application of these new and revised TFRS has resulted in changes in certain of the Company’s accounting policies.

The Company has initially applied TFRS - Financial instruments standards which comprise TFRS 9 *Financial Instruments* and relevant standards and interpretations and TFRS 16 *Leases* and disclosed impact from changes to significant accounting policies in note 3.

In addition, the Company has not early adopted a number of new and revised TFRS, which are not yet effective for the current period in preparing these financial statements. The Company has assessed the potential initial impact on the financial statements of these new and revised TFRS and expects that there will be no material impact on the financial statements in the period of initial application.

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements
For the year ended 31 December 2020

(b) *Functional and presentation currency*

The financial statements are presented in Thai Baht, which is the Company's functional currency.

(c) *Use of judgments and estimates*

The preparation of financial statements in conformity with TFRS requires management to make judgments, estimates and assumptions that affect the application of the Company's accounting policies. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

(i) *Judgements*

Information about judgements made in applying accounting policies that have the most significant effects on the amounts recognised in the financial statements is included in the following notes:

4(h) and 11 *Leases:*

- whether an arrangement contains a lease;
- whether the Company is reasonably certain to exercise extension options;
- whether the Company exercise termination options.

5 *Impact of COVID-19 Outbreak*

(ii) *Assumption and estimation uncertainties*

Information about assumption and estimation uncertainties at 31 December 2020 that have a significant risk of resulting in a material adjustments to the carrying amounts of assets and liabilities in the next financial year is included in the following notes:

15 *Measurement of defined benefit obligations: key actuarial assumptions;*

27 *Determining the fair value of financial instruments on the basis of significant unobservable inputs.*

3 Changes in accounting policies

From 1 January 2020, the Company has initially applied TFRS - Financial instruments standards and TFRS 16. Impact of changes in accounting policies on shareholders' equity are as follows:

	<i>Note</i>	Retained earnings (in thousand Baht)	Other components of equity
At 1 January 2019 - as reported		524,031	-
<i>Increase (decrease) due to:</i>			
Adoption of TFRS 16	<i>(b)</i>	(1,351)	-
Related tax	<i>(b)</i>	270	-

At 31 December 2019 - as reported		570,238	-
<i>Increase (decrease) due to:</i>			
Adoption of TFRS - Financial instruments standards			
Derivative and hedge accounting	(a.2)	4,760	(7,756)
Adoption of TFRS 16	(b)	(535)	-
Related tax	(a), (b)	(845)	1,551
At 1 January 2020 - restated		573,618	(6,205)

(a) TFRS - Financial instruments standards

The Company has adopted TFRS - Financial instruments standards by adjusting the cumulative effects to retained earnings and other component of equity on 1 January 2020. Therefore, the Company did not adjust the information presented for 2019. The disclosure requirements of TFRS for financial instruments have not generally been applied to comparative information.

These TFRS - Financial instruments standards establish requirements related to definition, recognition, measurement, impairment and derecognition of financial assets and financial liabilities, including accounting for derivatives and hedge accounting. The detail of accounting policies are disclosure in note 4(b) and 4(i). The impact from adoption of TFRS - Financial instruments standards are as follows:

(a.1) Classification and measurement of financial assets and financial liabilities

TFRS 9 contains three principal classification categories for financial assets: measured at amortised cost, fair value to other comprehensive income (FVOCI) and fair value to profit or loss (FVTPL). The classification is based on the cash flow characteristics of the financial asset and the business model in which they are managed. TFRS 9 eliminates the previous classification of held-to-maturity debt securities, available-for-sale securities, trading securities and general investment as specified by TAS 105.

Under TFRS 9, derivatives are measured at FVTPL. Previously, the Company recognised the derivatives when they were exercised.

The following table shows measurement categories under previous standards and TFRS 9, including reconciliation of the carrying amounts of each class of the Company's financial assets and financial liabilities as at 1 January 2020.

Classification under previous standards 31 December 2019	Classification under TFRS 9 at 1 January 2020			
Carrying amounts	Fair value - applied hedge accounting	Fair value through profit or loss	Fair value through other comprehensive income	Amortised cost - net
	<i>(in thousand Baht)</i>			
Financial assets				
Other current financial assets	-	39,743	-	-
Total financial assets	-	39,743	-	-

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements
For the year ended 31 December 2020

Classification under previous standards 31 December 2019	Classification under TFRS 9 at 1 January 2020				
	Carrying amounts	Fair value - applied hedge accounting	Fair value through profit or loss	Fair value through other comprehensive income	Amortised cost - net
Financial liabilities					
Other current financial liabilities	-	(40,610)	(2,129)	-	-
Total financial liabilities	-	(40,610)	(2,129)	-	-

(a.2) Derivatives and hedge accounting

Under TFRS 9, all derivatives are measured at fair value in the statement of financial position.

The Company designates certain derivatives held for risk management as well as certain non-derivative financial instruments as hedging instruments in qualifying hedging relationships. The Company documents the relationship between the hedging instruments and hedged items, including the risk management objective, strategy in undertaking the hedge, together with the method that will be used to assess the effectiveness of the hedging relationship. The Company makes an assessment of the effectiveness, both at inception of the hedge relationship and on an ongoing basis.

These hedging relationships are fair value hedges and cash flow hedges.

Previously, TFRS were silent on the requirements of hedge accounting and derivatives held for risk management purposes. In 2019, the Company accounted for these transactions as described in accounting policies in note 4(b).

The impact from adoption of derivatives and hedge accounting on the financial statements is as follows:

Statement of financial position

	<i>(in thousand Baht)</i>
At 1 January 2020	
Increase in other current financial assets	39,743
Increase in deferred tax assets	599
Increase in other current financial liabilities	(42,739)
Increase in retained earnings	(3,808)
Decrease in other component of equity – cash flow hedge reserve	6,205

(b) **TFRS 16 Leases**

From 1 January 2020, the Company has initially adopted TFRS 16 on contracts previously identified as leases according to TAS 17 *Leases* and TFRIC 4 *Determining whether an arrangement contains a lease* using the retrospective approach.

Previously, the Company, as a lessee, recognised payments made under operating leases in profit or loss on a straight-line basis over the term of the lease. Under TFRS 16, the Company assesses whether a contract is, or contains, a lease. If a contract contains lease and non-lease components, the Company allocates the consideration in the contract based on stand-alone selling price

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements
For the year ended 31 December 2020

(transaction price). At the commencement date, the Company recognised right-of-use assets and lease liabilities, as a result, the nature of expenses related to those leases was changed because the Company recognised depreciation of right-of-use assets and interest expense on lease liabilities.

On transition, the Company also elected to use practical expedient to not recognise right-to-use assets and lease liabilities for leases with less than 12 months of lease term.

The impact from adoption of TFRS 16 on the financial statements is as follows:

<i>Statement of financial position</i>	As previous reported	Adjustments (in thousand Baht)	As restated
At 1 January 2019			
Right-of-use assets	-	5,482	5,482
Deferred tax assets	21,519	270	21,789

Tax expense	30,929	163	31,092
Profit for the year	124,207	653	124,860
Basic earnings per share (in Baht)	2.59	0.01	2.60
Statements of cash flows			
For the year ended 31 December 2019			
Cash flows from operating activities	180,997	6,705	187,702
Cash flows used in investing activities	(28,765)	-	(28,765)
Cash flows used in financing activities	(145,365)	(6,705)	(152,070)

Right-of-use assets and lease liabilities shown above were presented as part of seamless copper tube segments.

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements
For the year ended 31 December 2020

4 Significant accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these financial statements except as explained in Note 3.

(a) Foreign currency transactions

Transactions in foreign currencies are translated to the functional currency at exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated to the functional currency at the exchange rate at the reporting date.

Non-monetary assets and liabilities measured at cost in foreign currencies are translated to the functional currency at the exchange rates at the dates of the transactions.

Foreign currency differences arising from the translation are recognised in profit or loss. However, foreign currency differences arising from the translation of qualifying cash flow hedges to the extent the hedge is effective are recognised in other comprehensive income.

(b) Financial instruments

Accounting policies applicable from 1 January 2020

(b.1) Recognition and initial measurement

Trade receivables and trade payables are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument.

A financial asset and financial liability (unless it is a trade receivable without a significant financing component or measured at FVTPL) is initially measured at fair value plus transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price. A financial asset and a financial liability measured at FVTPL are initially recognised at fair value.

(b.2) Classification and subsequent measurement

Financial assets – classification

On initial recognition, a financial asset is classified as measured at: amortised cost; fair value to other comprehensive income (FVOCI); or fair value to profit or loss (FVTPL).

Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified prospectively from the reclassification date.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)

Notes to the financial statements

For the year ended 31 December 2020

All financial assets not classified as measured at amortised cost or FVOCI are measured at FVTPL. This includes all derivative financial assets. See note 4(b.5) and 4(b.6) for financial assets designated as hedging instruments.

Financial assets – business model assessment

The Company makes an assessment of the objective of a business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Company's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how managers of the business are compensated - e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Company's continuing recognition of the assets.

Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

Financial assets – subsequent measurement and gains and losses

Financial assets at FVTPL are subsequently measured at fair value. Net gains and losses are recognised in profit or loss. However, see note 4(b.5) for derivatives designated as hedging instruments.

Other financial assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.

Financial liabilities – classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or FVTPL. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss. See note 4(b.5) and 4(b.6) for financial liabilities designated as hedging instruments.

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements
For the year ended 31 December 2020

(b.3) Derecognition

Financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

Financial liabilities

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire. The Company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

(b.4) Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

(b.5) Derivatives

Derivative are recognised at fair value. At the end of each reporting period the fair value is measured. The gain or loss on remeasurement to fair value is recognised immediately in profit or loss, except where the derivatives qualify for cash flow hedge accounting or fair value hedges of commodity price risk in which case recognition of any resultant gain or loss depends on nature of the item being hedged (see note 4(b.6)).

(b.6) Hedging

The Company designates certain derivatives as hedging instruments to hedge the variability in cash flows associated with highly probable forecast transactions arising from changes in foreign exchange rates and certain derivatives and non-derivative financial liabilities as hedges of commodity price risk.

At inception of designated hedging relationships, the Company documents the risk management objective and strategy for undertaking the hedge. The Company also documents the economic relationship between the hedged item and the hedging instrument, including whether the changes in cash flows of the hedged item and hedging instrument are expected to offset each other.

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements
For the year ended 31 December 2020

Cash flow hedges

When a derivative is designated as a cash flow hedging instrument, the effective portion of changes in the fair value of the derivative is recognised in OCI and accumulated in the hedging reserve. The effective portion of changes in the fair value of the derivative that is recognised in OCI is limited to the cumulative change in fair value of the hedged item, determined on a present value basis, from inception of the hedge. Any ineffective portion of changes in the fair value of the derivative is recognised immediately in profit or loss.

The Company designates only the change in fair value of the spot element of forward exchange contracts as the hedging instrument in cash flow hedging relationships. The change in fair value of the forward element of forward exchange contracts (forward points) is separately accounted for as a cost of hedging and recognised in a costs of hedging reserve within equity.

When the hedged forecast transaction subsequently results in the recognition of a non-financial item such as inventory, the amount accumulated in the hedging reserve and the cost of hedging reserve is included directly in the initial cost of the non-financial item when it is recognised.

For all other hedged forecast transactions, the amount accumulated in the hedging reserve and the cost of hedging reserve is reclassified to profit or loss in the same period or periods during which the hedged expected future cash flows affect profit or loss.

If the hedge no longer meets the criteria for hedge accounting or the hedging instrument is sold, expires, is terminated or is exercised, then hedge accounting is discontinued prospectively. When hedge accounting for cash flow hedges is discontinued, the amount that has been accumulated in the hedging reserve remains in equity until, for a hedge of a transaction resulting in the recognition of a non-financial item, it is included in the non-financial item's cost on its initial recognition or, for other cash flow hedges, it is reclassified to profit or loss in the same period or periods as the hedged expected future cash flows affect profit or loss.

If the hedged future cash flows are no longer expected to occur, then the amounts that have been accumulated in the hedging reserve and the cost of hedging reserve are immediately reclassified to profit or loss.

Fair value hedges

Where a derivative hedges the changes in fair value of a recognised asset, liability or unrecognised firm commitment (or an identified portion of such asset, liability or firm commitment), any gain or loss on remeasuring the fair value of the hedging instrument is recognised in profit or loss. The hedged item is also stated at fair value in respect of the risk being hedged, with any gain or loss being recognised in profit or loss.

Accounting policies applicable before 1 January 2020

Derivatives

Derivatives were recognised when they were exercised.

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements
For the year ended 31 December 2020

(c) Cash and cash equivalents

Cash and cash equivalents in the statements of cash flows comprise cash balances, call deposits and highly liquid short-term investments. Bank overdrafts that are repayable on demand are a component of financing activities for the purpose of the statement of cash flows.

(d) Trade and other receivables

A receivable is recognised when the Company has an unconditional right to receive consideration.

A receivable is measured at transaction price less allowance for expected credit loss (2019: *allowance for doubtful accounts*) which is determined based on an analysis of payment histories and future expectations of customer payments. Bad debts are written off when incurred.

(e) Inventories

Inventories are measured at the lower of cost and net realisable value.

Cost is calculated using the weighted average cost principle, and comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. In the case of manufactured inventories and work-in-progress, cost includes an appropriate share of production overheads based on normal operating capacity and is calculated using standard cost adjusted to approximate average cost.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs to complete and to make the sale.

(f) Property, plant and equipment

Recognition and measurement

Owned assets

Property, plant and equipment are measured at cost less accumulated depreciation and impairment losses.

Cost includes expenditure that is directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour, any other costs directly attributable to bringing the assets to a working condition for their intended use, the costs of dismantling and removing the items and restoring the site on which they are located, and capitalised borrowing costs. Cost also may include transfers from other comprehensive income of any gain or loss on qualifying cash flow hedges of foreign currency purchases of property, plant and equipment. Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Any gains and losses on disposal of item of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment, and are recognised in profit or loss.

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements
For the year ended 31 December 2020

Subsequent costs

The cost of replacing a part of an item of property, plant and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company, and its cost can be measured reliably. The carrying amount of the replaced part is derecognised. The costs of the day-to-day servicing of property, plant and equipment are recognised in profit or loss as incurred.

Depreciation

Depreciation is calculated based on the depreciable amount, which is the cost of an asset, or other amount substituted for cost, less its residual value.

Depreciation is charged to profit or loss on a straight-line basis over the estimated useful lives of each component of an item of property, plant and equipment. The estimated useful lives are as follows:

Land improvements	5 - 20 years
Buildings and improvements	5 - 20 years
Machinery and equipment	5 - 20 years
Furniture, fixtures and office equipment	5 - 10 years
Transportation equipment	5 years

No depreciation is provided on freehold land or assets under construction and machinery under installation.

Depreciation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

(g) Intangible assets

Intangible assets that are acquired by the Company and have finite useful lives are measured at cost less accumulated amortisation and accumulated impairment losses.

Subsequent expenditure

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is recognised in profit or loss as incurred.

Amortisation

Amortisation is based on the cost of the asset, or other amount substituted for cost, less its residual value.

Amortisation is recognised in profit or loss on a straight-line basis over the estimated useful lives of intangible assets from the date that they are available for use, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. The estimated useful lives for the current and comparative periods of computer software is 5 years.

Golf membership is measured at cost less accumulated impairment losses.

Amortisation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements
For the year ended 31 December 2020

(h) Leases

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. To assess whether a contract conveys the right to control the use of an identified asset, the Company uses the definition of a lease in TFRS 16.

As a lessee, at commencement or on modification of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices. However, for the leases of property the Company has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

The Company recognises a right-of-use asset and a lease liability at the lease commencement date, except for leases of low-value assets and short-term leases which is recognised as an expense on a straight-line basis over the lease term.

Right-of-use asset is measured at cost, less any accumulated depreciation and impairment loss, and adjusted for any remeasurements of lease liability. The cost of right-of-use asset includes the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of restoration costs, less any lease incentives received. Depreciation is charged to profit or loss on a straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Company by the end of the lease term or the cost of the right-of-use asset reflects that the Company will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. The lease payments included fixed payments less any lease incentive receivable, amount under option if the Company is reasonably certain to exercise option. Variable lease payments that do not depend on index or a rate are recognised as expenses in the accounting period in which they are incurred.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in lease term, change in lease payments, change in the estimate of the amount expected to be payable under a residual value guarantee, or a change in the assessment of purchase, extension or termination options. When the lease liability is remeasured, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

(i) Impairment of financial assets

Accounting policies applicable from 1 January 2020

The Company recognises allowances for expected credit losses (ECLs) on financial assets measured at amortised cost (including cash and cash equivalents, trade receivables and other receivables).

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive). ECLs are discounted at the effective interest rate of the financial asset.

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements
For the year ended 31 December 2020

ECLs are measured on either of the following bases:

- 12-month ECLs: these are losses that are expected to result from possible default events within the 12 months after the reporting date; or
- lifetime ECLs: these are losses that are expected to result from all possible default events over the expected lives of a financial instrument.

Loss allowances for trade receivables are always measured at an amount equal to lifetime ECLs. ECLs on these financial assets are estimated using a provision matrix based on the Company's historical credit loss experience, adjusted for factors that are specific to the debtors and an assessment of both current and forecast general economic conditions at the reporting date.

Loss allowances for all other financial instruments, the Company recognises ECLs equal to 12-month ECLs unless there has been a significant increase in credit risk of the financial instrument since initial recognition or credit-impaired financial assets, in which case the loss allowance is measured at an amount equal to lifetime ECLs.

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due, significant deterioration in financial instruments's credit rating, significant deterioration in the operating results of the debtor and existing or forecast changes in the technological, market, economic or legal environment that have a significant adverse effect on the debtor's ability to meet its obligation to the Company.

The Company considers a financial asset to be in default when:

- the debtor is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising security (if any is held); or
- the financial asset is more than 90 days past due.

Depending on the nature of the financial instruments, the assessment of a significant increase in credit risk is performed on either an individual basis or a collective basis. When the assessment is performed on a collective basis, the financial instruments are grouped based on shared credit risk characteristics, such as past due status and credit risk ratings.

ECLs are remeasured at each reporting date to reflect changes in the financial instrument's credit risk since initial recognition. Increased in loss allowance is recognised as an impairment loss in profit or loss. Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

Credit-impaired financial assets

At each reporting date, the Company assesses whether financial assets carried at amortised cost are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence of credit-impairment includes significant financial difficulty, a breach of contract such as more than 90 days past due, probable the debtor will enter bankruptcy.

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements
For the year ended 31 December 2020

Write-off

The gross carrying amount of a financial asset is written off when the Company has no reasonable expectations of recovering. Subsequent recoveries of an asset that was previously written off, are recognised as a reversal of impairment in profit or loss in the period in which the recovery occurs.

Accounting policies applicable before 1 January 2020

A receivable is measured at transaction price less allowance for doubtful accounts which is determined based on an analysis of payment histories and future expectations of customer payments.

(j) Impairment of non-financial assets.

The carrying amounts of the Company's assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, the assets' recoverable amounts are estimated.

An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. The impairment loss is recognised in the profit or loss.

Calculation of recoverable amount

The recoverable amount of a non-financial asset is the greater of the asset's value in use and fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

Reversals of impairment

Impairment losses recognised in prior periods in respect of non-financial assets are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

(k) Employee benefits

Defined contribution plans

Obligations for contributions to defined contribution plans are expensed as the related service is provided.

Defined benefit plans

The Company's net obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount.

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements
For the year ended 31 December 2020

The calculation of defined benefit obligations is performed by a qualified actuary using the projected unit credit method. When the calculation results in a potential asset for the Company, the recognised asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan. To calculate the present value of economic benefits, consideration is given to any application minimum funding requirements.

Remeasurements of the net defined benefit liability, actuarial gain or loss are recognised immediately in other comprehensive income. The Company determines the interest expense on the net defined benefit liability for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period, taking into account any changes in the net defined benefit liability during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to defined benefit plans are recognised in profit or loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognised immediately in profit or loss. The Company recognises gains and losses on the settlement of a defined benefit plan when the settlement occurs.

Other long-term employee benefits

The Company's net obligation in respect of long-term employee benefits is the amount of future benefit that employees have earned in return for their service in the current and prior periods. That benefit is discounted to determine its present value. Remeasurements are recognised in profit or loss in the period in which they arise.

Short-term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(l) Provisions

A provision is recognised if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognised as finance cost.

(m) Fair value measurement

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Company has access at that date. The fair value of a liability reflects its non-performance risk.

A number of the Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements
For the year ended 31 December 2020

When one is available, the Company measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as 'active' if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the Company uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

If an asset or a liability measured at fair value has a bid price and an ask price, then the Company measures assets and long positions at a bid price and liabilities and short positions at an ask price.

The best evidence of the fair value of a financial instrument on initial recognition is normally the transaction price – i.e. the fair value of the consideration given or received. If the Company determines that the fair value on initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique for which any unobservable inputs are judged to be insignificant in relation to the measurement, then the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value on initial recognition and the transaction price. Subsequently, that difference is recognised in profit or loss on an appropriate basis over the life of the instrument but no later than when the valuation is wholly supported by observable market data or the transaction is closed out.

Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- *Level 1:* quoted prices (unadjusted) in active markets for identical assets or liabilities.
- *Level 2:* inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- *Level 3:* inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or liability might be categorised in different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

(n) Revenue

Revenue is recognised when a customer obtains control of the goods or services in an amount that reflects the consideration to which the Company expects to be entitled, excluding those amounts collected on behalf of third parties, value added tax and is after deduction of any trade discounts and volume rebates.

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements
For the year ended 31 December 2020

Sale of goods

Revenue from sales of goods is recognised when a customer obtains control of the goods, generally on delivery of the goods to the customers. For contracts that permit the customers to return the goods, revenue is recognised to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur. Therefore the amount of revenue recognised is adjusted for estimated returns, which are estimated based on the historical data.

For bundled packages, the Company accounts for individual products and services separately if they are distinct (i.e. if a product or service is separately identifiable from other items and a customer can benefit from it) or the multiple services are rendered in different reporting periods. The consideration received is allocated based on their relative stand-alone selling prices which are determined based on the price list at which the Company sells the products and services in separate transactions.

(o) Interest

Accounting policies applicable from 1 January 2020

Effective Interest Rate (EIR)

Interest income or expense is recognised using the effective interest method. The EIR is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- the gross carrying amount of the financial asset; or
- the amortised cost of the financial liability.

In calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortised cost of the liability. However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the amortised cost of the financial asset. If the asset is no longer credit-impaired, then the calculation of interest income reverts to the gross basis.

Accounting policies applicable before 1 January 2020

Interest income is recognised in profit or loss at the rate specified in the contract.

Interest expenses and similar costs are charged to profit or loss for the period in which they are incurred, except to the extent that they are capitalised as being directly attributable to the acquisition, construction or production of an asset which necessarily takes a substantial periods of time to be prepared for its intended use or sale.

(p) Income tax

Income tax expense for the year comprises current and deferred tax. Current and deferred tax are recognised in profit or loss except items recognised directly in equity or in other comprehensive income.

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements
For the year ended 31 December 2020

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

The measurement of deferred tax reflects the tax consequences that would follow the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

In determining the amount of current and deferred tax, the Company takes into account the impact of uncertain tax positions and whether additional taxes and interest may be due. The Company believes that its accruals for tax liabilities are adequate for all open tax years based on its assessment of many factors, including interpretations of tax law and prior experience. This assessment relies on estimates

and assumptions and may involve a series of judgments about future events. New information may become available that causes the Company to change its judgment regarding the adequacy of existing tax liabilities; such changes to tax liabilities will impact tax expense in the period that such a determination is made.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilised. Future taxable profits are determined based on the reversal of relevant taxable temporary differences. If the amount of taxable temporary differences is insufficient to recognise a deferred tax asset in full, then future taxable profits, adjusted for reversals of existing temporary differences, are considered, based on the business plans for the Company. Deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that the related tax benefit will be realised.

(q) Earnings per share

The Company presents basic earnings per share (“EPS”) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period.

(r) Related parties

A related party is a person or entity that has direct or indirect control, or has significant influence over the financial and managerial decision-making of the Company; a person or entity that are under common control or under the same significant influence as the Company; or the Company has direct or indirect control or has significant influence over the financial and managerial decision-making of a person or entity.

(s) Segment reporting

Segment results that are reported to the Company’s CEO (the chief operating decision maker) include items directly attributable to a segment as well as those that can be allocated on a reasonable basis.

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements
For the year ended 31 December 2020

5 Impact of COVID-19 Outbreak

Due to the COVID-19 outbreak at the beginning of 2020, Thailand and many other countries have enacted several protective measures against the outbreak, e.g. the order to temporarily shut down operating facilities or reduce operating hours, social distancing, etc. This has significantly affected world economy, production, supply chain of goods and business operation of many entities in wide areas. The management is closely monitoring the situation to ensure the safety of the Company's staff and to manage the negative impact on the business as much as possible.

At 31 December 2020, the situation of COVID-19 outbreak is still ongoing, resulting in estimation uncertainty on the potential impact, therefore, the Company elected to apply accounting guidance on temporary accounting relief measures for additional accounting options in response to impact from the situation of COVID-19 outbreak on impairment of trade receivables under simplified approach using historical loss rate and did not take forward-looking information into account.

Commitments with related party

As at 31 December 2020, the Company had outstanding future contracts with Furukawa Electric Co., Ltd., a related company, to hedge the copper cathode price of 1,400 tons, in amount of U.S. Dollars 8.0 million, equivalent to Baht 240.7 million (2019: 2,890 tons, in amount of U.S. Dollars 17.0 million, equivalent to Baht 515.8 million).

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements
For the year ended 31 December 2020

Significant agreements with related parties

Long-term Contract for the Purchase of Copper Cathodes

On 28 December 2007, the Company entered into a Long-term Contract for the Purchase of Copper Cathodes contract with Furukawa Electric Singapore Pte. Ltd., a related company, under the terms of which the Company has agreed to purchase copper cathodes from the said related company at the market price averaged during the contractual month of shipment plus the rate prescribed in the agreement.

Hedge Agreement

On 1 March 2015, the Company entered into a master hedging agreement with Furukawa Electric Co., Ltd. ("FEC"), a related company, to hedge against the price fluctuation for the sale of copper product made by the Company to its customers in Thailand. Under the terms of agreement, FEC shall provide hedge service to the Company by entering into hedge contracts with the London Metal Exchange in accordance with the terms and condition stated in each hedge application requested by the Company. In consideration thereof, the Company is committed to pay a hedge service fee at the rate of U.S. Dollars 3 per ton. In addition, the difference between the hedge price and the market price shall be payable by the Company or FEC, as the case maybe, at the end of each hedge period or within 15 days or other periods as agreed by both parties after the end of hedge period. This agreement is effective on the agreement date and shall be terminated by either party giving at least 90 days notice in writing to the other party.

Technical Collaboration Agreement

On 1 April 2020, the Company entered into technical collaboration agreement with Daishin P&T Co., Ltd., the related party, for a period of 1 year effective on 1 April 2020. The agreement shall be automatically extended for successive periods of one year each. Under the terms of the agreement, Daishin P&T Co., Ltd. shall provide the Company with technical collaboration and information on the manufacturing operations including an exclusive right to manufacture and sell the product in the countries as specified in the agreement. In consideration thereof, the Company is committed to pay a technical assistance fee computed from the net sales volume of seamless copper tube (Inner grooved tube) at the rate of Baht 2.25 per kilogram.

System Development Service Support Agreement

On 1 June 2020, the Company entered into the System Development Service Support Agreement with Furukawa (Thailand) Co., Ltd., a related company. Under the terms of agreement, Furukawa (Thailand) Co., Ltd. shall provide the Company with support for maintenance project of Total Production Management System. In consideration thereof, the Company is committed to pay a service fee computed from consulting service hour at the rates as stipulated in the agreement. The agreement will be expired on 31 May 2021.

Basic Trading Agreement

On 1 April 2013, the Company entered into the Basic Trading Agreement with Furukawa (Thailand) Co., Ltd., a related company. Under the terms of agreement, Furukawa (Thailand) Co., Ltd. shall provide the Company with services relating to the information system such as outsourcing, sale and purchase of electronic equipment, etc. In consideration thereof, the Company is committed to pay a consulting fee computed from consulting service. This agreement is effective on the agreement date and shall be terminated by either party giving at least 3 months notice in writing to the other party.

		<i>(in thousand Baht)</i>	
<i>Right-of-use assets</i>			
Buildings		3,982	6,371
Equipment		1,564	2,245
Vehicles		2,283	3,065
Total	3	<u>7,829</u>	<u>11,681</u>

In 2020, additions to the right-of-use assets of the Company were Baht 0.7 million.

The Company leases a number of office building and office premises for 3 years, with extension options at the end of lease term. The rental is payable monthly as specified in the contract.

Extension options

Some property leases contain extension options exercisable by the Company up to one year before the end of the non-cancellable contract period. Where practicable, the Company seeks to include extension options in new leases to provide operational flexibility. The extension options held are exercisable only by the Company and not by the lessors. The Company assesses at lease commencement date whether it is reasonably certain to exercise the extension options. The Company reassesses whether it is reasonably certain to exercise the options if there is a significant event or significant changes in circumstances within its control.

The Company has estimated that the potential future lease payments, should it exercise the extension option, would result in an increase in lease liability of Baht 7.4 million.

The holders of ordinary shares are entitled to receive dividends as declared from time to time, and are entitled to one vote per share at meetings of the Company.

Share premium

Section 51 of the Public Companies Act B.E. 2535 requires companies to set aside share subscription monies received in excess of the par value of the shares issued to a reserve account ("share premium"). Share premium is not available for dividend distribution.

17 Reserves

Reserves comprise:

Appropriations of profit and/or retained earnings

Legal reserve

Section 116 of the Public Companies Act B.E. 2535 requires that a public company shall allocate not less than 5% of its annual net profit, less any accumulated losses brought forward, to a reserve account ("legal reserve"), until this account reaches an amount not less than 10% of the registered authorised capital. The legal reserve is not available for dividend distribution.

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements
For the year ended 31 December 2020

Other components of equity

Cash flow hedge reserve

The cash flow hedge reserve comprises the effective portion of the cumulative net change in the fair value of hedging instruments used in cash flow hedges pending subsequent recognition in profit or loss or directly included in the initial cost or other carrying amount of a non-financial asset or non-financial liability.

18 Segment information and disaggregation of revenue

Management considers that the Company operates in a single line of business, namely seamless copper tube, and has, therefore, only one reportable segment.

Geographical segments

The Company is managed and operates principally in Thailand. In presenting information on the basis of geographical segments, segment revenue is based on the geographical location of customers.

Notes to the financial statements
For the year ended 31 December 2020

Financial instruments measured at fair value

Type	Valuation technique
Forward exchange contracts	<i>Forward pricing:</i> The fair value is determined using quoted forward exchange rates at the reporting date and present value calculations based on high credit quality yield curves in the respective currencies.
Copper future contract	<i>Market comparison technique:</i> The fair value is determined using broker quoted. Similar contracts are traded in an active market and the quotes reflect the actual transactions on similar instruments.

(b) Financial risk management policies

Risk management framework

The Company's board of directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The board of directors has established the risk management committee, which is responsible for developing and monitoring the Company's risk management policies. The committee reports regularly to the board of directors on its activities.

The Company's risk management policies are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company, through its training and management standards and procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Company audit committee oversees how management monitors compliance with the Company's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Company. The Company audit committee is assisted in its oversight role by internal audit. Internal audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the audit committee.

(b.1) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers.

(b.1.1) Trade receivables

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer. However, management also considers the factors that may influence the credit risk of its customer base, including the default risk associated with the industry and country in which customers operate. Detail of concentration of revenue are included in note 18.

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements
For the year ended 31 December 2020

Loss rates are based on actual credit loss experience over the past four years. These rates are multiplied by scalar factors to reflect differences between economic conditions during the period over which the historical data has been collected and current conditions.

As at 31 December 2020 and 2019, the Company has no allowance for impairment loss of trade receivables.

<i>Trade receivables</i>	<i>Note</i>	2020 <i>(in thousand Baht)</i>	2019
Related parties

Total		<u>1,532,169</u>	<u>1,592,598</u>

(b.1.2) Cash and cash equivalent and derivatives

The Company's exposure to credit risk arising from cash and cash equivalents and derivatives is limited because the counterparties are creditworthy as banks, financial institutions and a related party.

(b.2) Liquidity risk

The Company monitors its liquidity risk and maintains a level of cash and cash equivalents deemed adequate by management to finance the Company's operations and to mitigate the effects of fluctuations in cash flows.

The following table are the remaining contractual maturities of financial liabilities at the reporting date. The amounts are gross and undiscounted and include contractual interest payments and exclude the impact of netting agreements.

<i>At 31 December 2020</i>	Carrying amount	1 year or less	Contractual cash flows			Total
			More than 1 year but less than 2 years	More than 2 years but less than 5 years	More than 5 years	
			<i>(in thousand Baht)</i>

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements
For the year ended 31 December 2020

<i>At 31 December 2020</i>	Carrying amount	1 year or less	Contractual cash flows			Total
			More than 1 year but less than 2 years	More than 2 years but less than 5 years	More than 5 years	
<i>Derivative financial liabilities</i>						
Copper future contracts used for hedging	(125,097)	(37,615)	-	-	-	(37,615)
Forward exchange contracts used for hedging:	(8,108)					
- Cash outflow		(389,592)	-	-	-	(389,592)
- Cash inflow		383,814	-	-	-	383,814
	<u>(133,205)</u>	<u>(43,393)</u>	<u>-</u>	<u>-</u>	<u>-</u>	<u>(43,393)</u>

The cash inflows/cash outflows disclosed in the above table represent the contractual undiscounted cash flows relating to derivative financial liabilities held for risk management purposes and which are not usually closed out before contractual maturity. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross cash settlement.

(b.3) Market risk

The Company is exposed to normal business risks from changes in market interest rates and currency exchange rates and from non-performance of contractual obligations by counterparties. The Company does not hold or issue derivatives for speculative or trading purposes.

(b.3.1) Foreign currency risk

The Company is exposed to foreign currency risk relating to purchases and sales which are denominated in foreign currencies. The Company primarily utilizes forward exchange contracts with maturities of less than one year to hedge such financial assets and liabilities denominated in foreign currencies. The forward exchange contracts entered into at the reporting date also relate to anticipated purchases and sales, denominated in foreign currencies, for the subsequent period.

The Company is exposed to the transactions with foreign currency risk to the extent that there is a mismatch between the currencies in which sales, purchases and receivables are denominated and the respective functional currencies of the Company. The functional currencies of the Company are primarily Thai Baht (THB). The currencies in which these transactions are primarily denominated are Euro, US dollars, and Japan Yen.

The Company's risk management policy is to hedge 70% to 90% its estimated foreign currency exposure in respect of forecast sales and purchases over the following 12 months at any point in time. The Company uses forward exchange contracts to hedge its currency risk, mostly with less-than-one-year maturity from the reporting date. These contracts are generally designated as cash flow hedges.

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)

Notes to the financial statements

For the year ended 31 December 2020

The Company designates the spot element of forward foreign exchange contracts to hedge its currency risk and applies a hedge ratio of 1:1. The forward elements of forward exchange contracts are excluded from the designation of the hedging instrument and are separately accounted for as a cost of hedging, which is recognised in equity in a cost of hedging reserve. The Company's policy specifies the critical terms of the forward exchange contracts to align with the hedged item.

The Company determines the existence of an economic relationship between the hedging instrument and hedged item based on the currency, amount and timing of their respective cash flows.

The Company assesses whether the derivative designated in each hedging relationship is effective in offsetting changes in cash flows of the hedged item using the hypothetical derivative method.

In these hedge relationships, the main sources of ineffectiveness are:

- the effect of the counterparties' and the Company's own credit risk on the fair value of the forward foreign exchange contracts, which is not reflected in the change in the fair value of the hedged cash flows attributable to the change in exchange rates; and
- differences in the timing of the hedged transactions

<i>Exposure to foreign currency at 31 December</i>	2020			2019		
	USD	JPY	Total <i>(in thousand Baht)</i>	USD	JPY	Total

Net exposure	256,855	(7,285)	249,570	395,056	(3,033)	392,023

(b.3.1) Interest rate risk

Interest rate risk is the risk that future movements in market interest rates will affect the results of the Company's operations and its cash flows because loan interest rates are mainly fixed. The Company is primarily exposed to interest rate risk from its borrowings (see note 13). The Company mitigates this risk by ensuring that the majority of its borrowings are at fixed interest rates.

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements

Foreign currency risk – inventory purchase	7,757
Tax on movements on reserves during the year	(30)
Balance at 31 December 2020	6,086

(b.5) Fair value hedge

Copper future contracts - Master hedge agreements

The Company is exposed to copper price risk arising from sales commitment with customers. The Company entered into copper future contracts in order to hedge the commodities price risk and determines the economic relationship between the hedging instrument and the hedged items and apply this strategy to all similar exposures.

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements
For the year ended 31 December 2020

At 31 December 2020, the Company held the following financial instruments to hedge exposures to changes in commodity price.

	1-6 months	Maturity 6-12 months	More than one year
<i>At 31 December 2020</i>			
<i>Commodity price risk</i>			
<i>Copper future contracts</i>			
Net exposure (in thousand Baht)	216,939	23,716	-
Average copper contracts rate per metric tons (in thousand Baht)	189.73	170.15	-

The amounts relating to items designated as hedging instruments and hedge ineffectiveness were as follows.

	(in thousand Baht)
<i>Commodity price risk</i>	
<i>At 31 December 2020</i>	
Copper future contracts – nominal amount	240,655
Carrying amount included in:	
- other current financial assets	87,483
- other current financial liabilities	(125,097)
<i>For the year ended 31 December 2020</i>	
<i>Recognised in profit or loss</i>	
- hedge ineffectiveness included in hedging loss for hedge of group of items with off-setting risk positions	(197)

28 Capital management

The Board of Directors' policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The Board monitors the return on capital and also monitors the level of dividends to ordinary shareholders.

29 Commitments with non-related parties

	2020	2019
	(in thousand Baht)

Total	13,559	14,009

Fine Metal Technologies Public Company Limited
(Formerly Furukawa Metal (Thailand) Public Company Limited)
Notes to the financial statements
For the year ended 31 December 2020

30 Events after the reporting period

- 30.1 At the Board of Directors' meeting held on 19 February 2021, the directors resolved to propose the dividend payment at Baht 1.625 per share. The dividend payment shall be approved by its shareholders at the annual general meeting of the shareholders.
- 30.2 As disclosed in note 5, the Company has elected to apply accounting guidance on temporary accounting relief measures for additional accounting options in response to impact from the situation of coronavirus pandemic (COVID-19). The guidance expired on 31 December 2020.

The COVID-19 pandemic continued subsequent to the expiration of the guidance as increasingly affected cases were found and spread all over Thailand. In response to the situation, Thailand has enacted measures to monitor and control the spread, encouraging people to keep social distancing, avoid crowded gathering and travel less. Meanwhile, according to information from the World Health Organization (WHO), vaccines for COVID-19 have become available and are being rolled out around the world. However, it is still not possible to predict for how long and to what extent the vaccines will provide protection and when the spread will be over.

As the situation is highly uncertain and fluid, it is currently not possible to determine the impact of the continued pandemic, government measures and roll out of the vaccination on the business of the Company. Management is closely monitoring the situation and managing to lessen the impact as much as possible.
